SUMMARY

Computer Science Engineering undergraduate pursuing a Software Engineer role with hands-on full-stack experience across backend services, REST APIs, databases, and deployment. Builds and ships web applications with Python, TypeScript, Node.js, FastAPI, and Flask, backed by PostgreSQL, Firebase, and Supabase, deployed on AWS, Vercel, and Render using a Git/GitHub workflow. Experienced with AI-assisted development and Generative AI (LLM applications, RAG, AI agents, tool calling, prompt-to-app automation) to take features from customer problem to working, deployable software. Cloud-focused, quick to learn new frameworks, and a collaborative team member with a consistent record of technical competition achievement.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL
Full-Stack & Backend: Node.js, REST APIs, FastAPI, Flask, Full-Stack Web Development, API Design and Integration
Databases: PostgreSQL, Firebase, Supabase, SQL
Cloud & DevOps: AWS, IBM Cloud, Cloud Deployment, Vercel, Render, Git/GitHub
AI-Assisted Development & Generative AI: GenAI, AI-Assisted Development, LLMs, AI Agents, Agentic AI, Tool Calling, RAG, Embeddings, Vector Databases, Prompt Engineering, AI Automation
Testing & Tools: Postman (API Testing), VS Code, Android Studio, Figma, Google Colab, Kaggle
Machine Learning: TensorFlow, PyTorch, Scikit-learn, OpenCV, NumPy, Pandas

INTERNSHIP EXPERIENCE

Green Skills & Applied AI Intern | 1M1B Foundation (Microsoft Elevate) | Jun 2026 – Aug 2026 | 70+ hours
- Completed 70+ hours of hands-on learning in Green Skills, AI, and Data Analysis, applying AI to real-world sustainability challenges.
- Built CarbonMind AI, an AI-enabled sustainability project; selected among the Top 20 projects out of 260+ submissions.

AI & Automation Intern | BharatCares® | Jun 2026 – Jul 2026 (2 mos) | Remote
- Built a Prompt-to-App project that turns natural-language prompts into functional, deployable websites, integrating AI automation directly into the software development workflow.
- Explored and applied Generative AI, Agentic AI, AI automation, and Intelligent Virtual Agents in production-style workflows at BharatCares®, an AI-solutions startup.

AI & Cloud Intern | Edunet Foundation (IBM SkillsBuild)
- Designed, trained, and deployed a machine learning model on IBM Cloud using Python, applying cloud-computing and ML fundamentals to ship a functional, cloud-hosted AI solution.
- Used IBM watsonx to accelerate development and deliver working projects faster.

PROJECTS

Women Safety App (RakshaNet) | TypeScript, Firebase, Android Studio, Leaflet Maps API
- Developed a mobile safety application in TypeScript providing one-tap SOS alerts and real-time GPS location sharing.
- Integrated Firebase for backend services and the Leaflet Maps API for location visualization.
- Implemented offline emergency functionality using mesh networking for peer-to-peer alerts in low-connectivity situations.

Cloud Cart — Cloud-Based E-Commerce Platform (Ongoing) | Node.js, AWS
- Building a cloud-enabled e-commerce backend with Node.js REST APIs, integrating AWS services for deployment.

Carbon Mind AI — Sustainability Platform
- Created an AI-driven web application that estimates a user's carbon footprint and generates personalized eco-friendly action plans using Python, TensorFlow, Pandas, and Google AI Studio.

Farm Marketplace — AI-Agent & Blockchain Agricultural Marketplace (Ongoing)
- Final-year mobile marketplace connecting farmers, buyers, and delivery partners, with an AI agent for order organization and a blockchain-based trust layer.

CERTIFICATIONS

- Getting Started with AI & Journey to Cloud — IBM SkillsBuild
- SQL for Analysts: Query Your Way to Insights — DevTown
- Low Code No Code & Machine Learning Development Bootcamp — YHills

EDUCATION

St. Joseph Engineering College, Mangalore — B.Tech, Computer Science Engineering (2023 – 2027)
St. Joseph's Pre-University College, Bangalore — PUC (PCMC) (2023)
St. Joseph's Indian High School, Bangalore — SSLC (10th) (2021)

ACHIEVEMENTS

- Represented the Karnataka & Goa Directorate in NCC at the national level, presenting a society-focused technical solution among competitors from different states; completed NCC Cadet training in leadership, discipline, and teamwork.
- Competed as a State-Level Hockey, Floorball and Athletics player, demonstrating discipline, competitiveness, and team collaboration.
- Google PromptWars Virtual – Challenge 4 (Google for Developers & H2S) — Built CarbonMind AI; ranked Top 1,000 of 35,000+ participants.
