PROFESSIONAL SUMMARY

Computer Science Engineering student with hands-on experience building end-to-end software products, AI-powered applications, and cloud-based solutions. Skilled in Python, JavaScript/TypeScript, React, Node.js, databases, REST APIs, Generative AI, Machine Learning, and cloud technologies. Strong in problem-solving, product thinking, research, and technical communication, with leadership and presentation experience through national-level NCC participation and competitive sports. Seeking roles as Product Engineer, AI Product Engineer, Software Engineer, or technology-focused Business Development professional.

TECHNICAL SKILLS

Programming: Python, SQL, C
Frontend & Backend: React.js, React Native, Expo, HTML, Tailwind CSS, Express.js, Flask, REST APIs
Databases: PostgreSQL, Supabase
AI & Machine Learning: Machine Learning, NLP, Generative AI, LLMs, Prompt Engineering, AI Automation, AI Agents, Intelligent Virtual Agents
Product & Cloud: Product Development, System Design Fundamentals, AI Integration, Docker, AWS Fundamentals, IBM Cloud, Git/GitHub
Business & Tools: Market Research, Lead Research, Client & Industry Research, Presentations, Proposal Preparation, Project Management, Documentation, Cross-functional Collaboration, Figma, Google Colab

PROJECTS

SmartTransit Cloud — AI-Powered Bus Pass System | React, Flask, PostgreSQL, Redis, Docker, Generative AI
- Built a digital bus-pass platform with 7-step registration, QR boarding passes, travel wallet, and admin approval dashboard.
- Integrated a Generative AI assistant with voice commands; used Docker Compose and Redis caching for deployment and performance.

Student Information System | React, TypeScript, Tailwind CSS, Supabase
- Developed student, teacher, and admin portals for records, grades, and rankings with CRUD and CSV/PDF export.
- Built QR code generation and camera scanning for profile lookup; Supabase authentication with row-level security.

CloudCart Enterprise — E-Commerce Platform | Node.js, Express.js, PostgreSQL, Supabase
- Built a scalable REST API for authentication, products, cart, wishlist, orders, and admin analytics.
- Integrated Razorpay payments, Nodemailer emails, and PDF invoices; secured with bcrypt, Helmet, rate limiting, and input validation.

EXPERIENCE

AI & Automation Intern | BharatCares® | Remote Jun 2026 – Jul 2026
- Built a Prompt-to-App workflow that converts natural-language prompts into functional, deployable websites using Generative AI and automation.
- Explored Agentic AI and intelligent virtual agents in production-style workflows, identifying practical AI automation use cases.

AI & Cloud Intern | Edunet Foundation (IBM SkillsBuild)
- Designed, trained, and deployed a machine learning model on IBM Cloud using Python, with IBM watsonx to accelerate development.
- Gained hands-on experience across the AI model development-to-deployment lifecycle.

EDUCATION

St. Joseph Engineering College, Mangaluru — Bachelor of Engineering, Computer Science Engineering 2023 – 2027
St. Joseph's Pre-University College, Bangalore — PUC (PCMC) 2023
St. Joseph's Indian High School, Bangalore — SSLC (10th) 2021

CERTIFICATIONS

- Google Project Management — MindLuster (Feb 2026); Project Management — Great Learning Academy (Jul 2024)
- Python for Data Science; Introduction to Python — Infosys Springboard (Jun 2025); R Programming Fundamentals — Infosys Springboard (Feb 2025)
- Adobe University Hackathon — Participant, Adobe (via Unstop)

ACHIEVEMENTS & LEADERSHIP

- Represented the Karnataka & Goa Directorate at the national level through NCC, presenting a society-focused technical solution; trained in leadership, discipline, and teamwork.
- Competed at State Level in Hockey, Floorball, and Athletics, demonstrating consistency, teamwork, and competitive discipline.
- Built CarbonMind AI at Google PromptWars Virtual Challenge 4; ranked in the Top 1,000 of 35,000+ participants.
