Subject: Application for Intern Bachelors Software Engineering

Dear Hiring Manager,

I am writing to apply for the Intern Bachelors Software Engineering position at Honeywell Aerospace. I am a final-year B.Tech Computer Science Engineering student at St. Joseph Engineering College, Mangalore (graduating 2027), with hands-on experience in both full-stack development and AI/ML. I am excited by the chance to bring that mix of skills to your team.

Most recently, I worked as an AI & Automation Intern at BharatCares®, where I built a Prompt-to-App project that turns natural-language prompts into functional, deployable websites. The work gave me practical experience with Generative AI, Agentic AI, and intelligent virtual agents in production-style workflows. Earlier, as an AI & Cloud Intern with Edunet Foundation (IBM SkillsBuild), I designed, trained, and deployed a machine learning model on IBM Cloud using Python and IBM watsonx.

On the engineering side, I build web applications and REST APIs with Python, FastAPI, Flask, and Node.js, backed by PostgreSQL, Firebase, and Supabase, and deploy them on Vercel and Render. My projects reflect this range:

- **CarbonMind AI:** an AI-driven platform that estimates a user's carbon footprint and generates personalized action plans using Python, TensorFlow, and Pandas. It earned a Top 1,000 rank out of 35,000+ participants in Google PromptWars Virtual.
- **RakshaNet:** a women's safety app with one-tap SOS alerts, real-time GPS sharing, and offline peer-to-peer alerts via mesh networking, built with Firebase and the Leaflet Maps API.
- **Farm Marketplace:** my completed final-year project, which connects farmers, buyers, and delivery partners with an AI agent for order organization and a blockchain-based trust layer.

Beyond technical work, my NCC experience, where I represented the Karnataka & Goa Directorate at the national level, and my time as a state-level hockey, floorball, and athletics player taught me discipline, leadership, and how to perform in a team under pressure. I am equally comfortable working independently and collaborating with others.

I am eager to learn from the engineers at Honeywell Aerospace and to contribute my skills in AI, cloud, and full-stack development as an intern. Thank you for considering my application. I have attached my resume and would be glad to speak with you about the role at a time that suits you.

Sincerely,

Akshay Gabrieal R
